IntelliFrame (Single Camera)

Introduction

Yealink Intelligent camera supports dynamic tracking of multiple speakers. In this mode, up to 4 speakers' HD portraits can be displayed simultaneously.

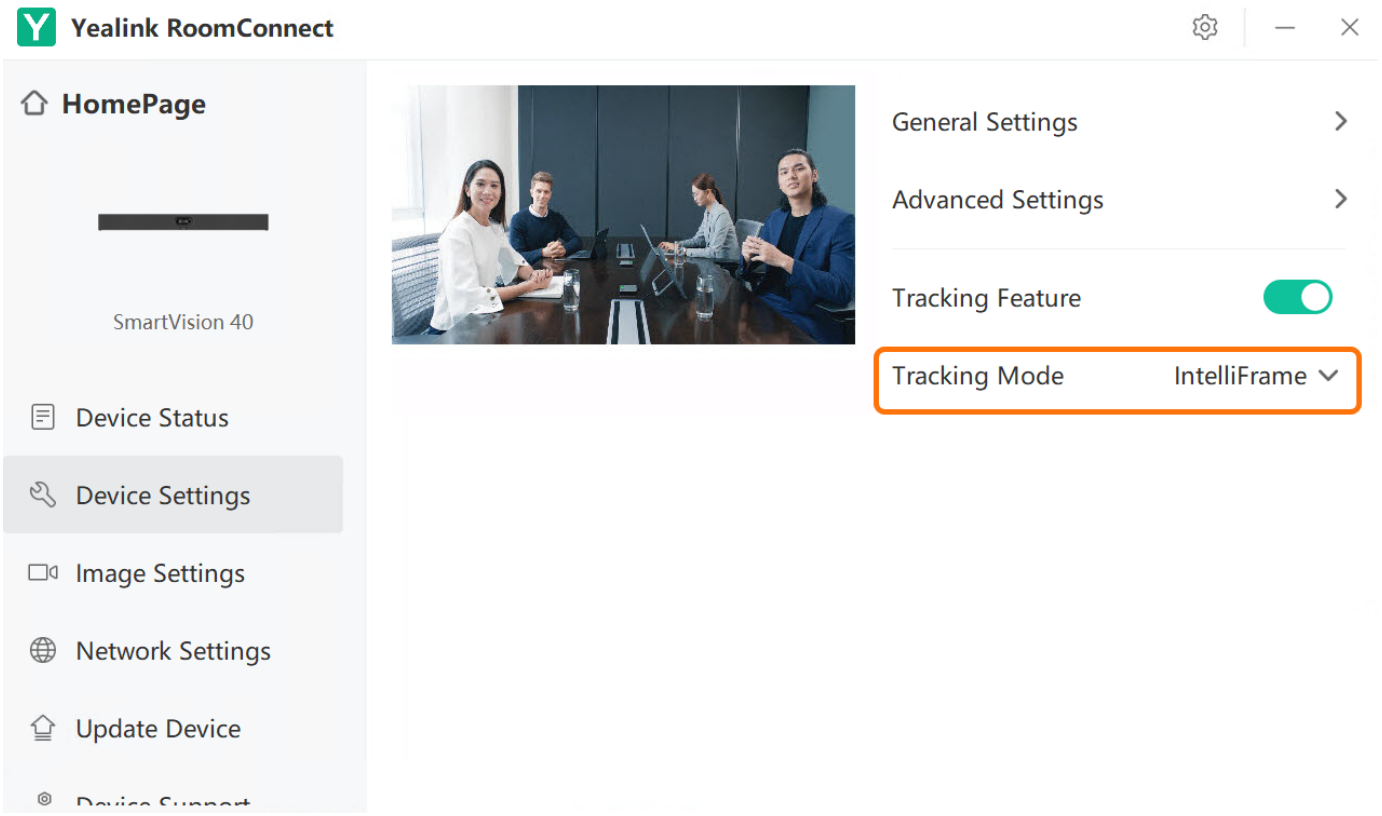
Supported Devices

For details on supported devices, refer to Rooms Supported Features List.

Enable IntelliFrame

SmartVision 60 enables this feature by default.

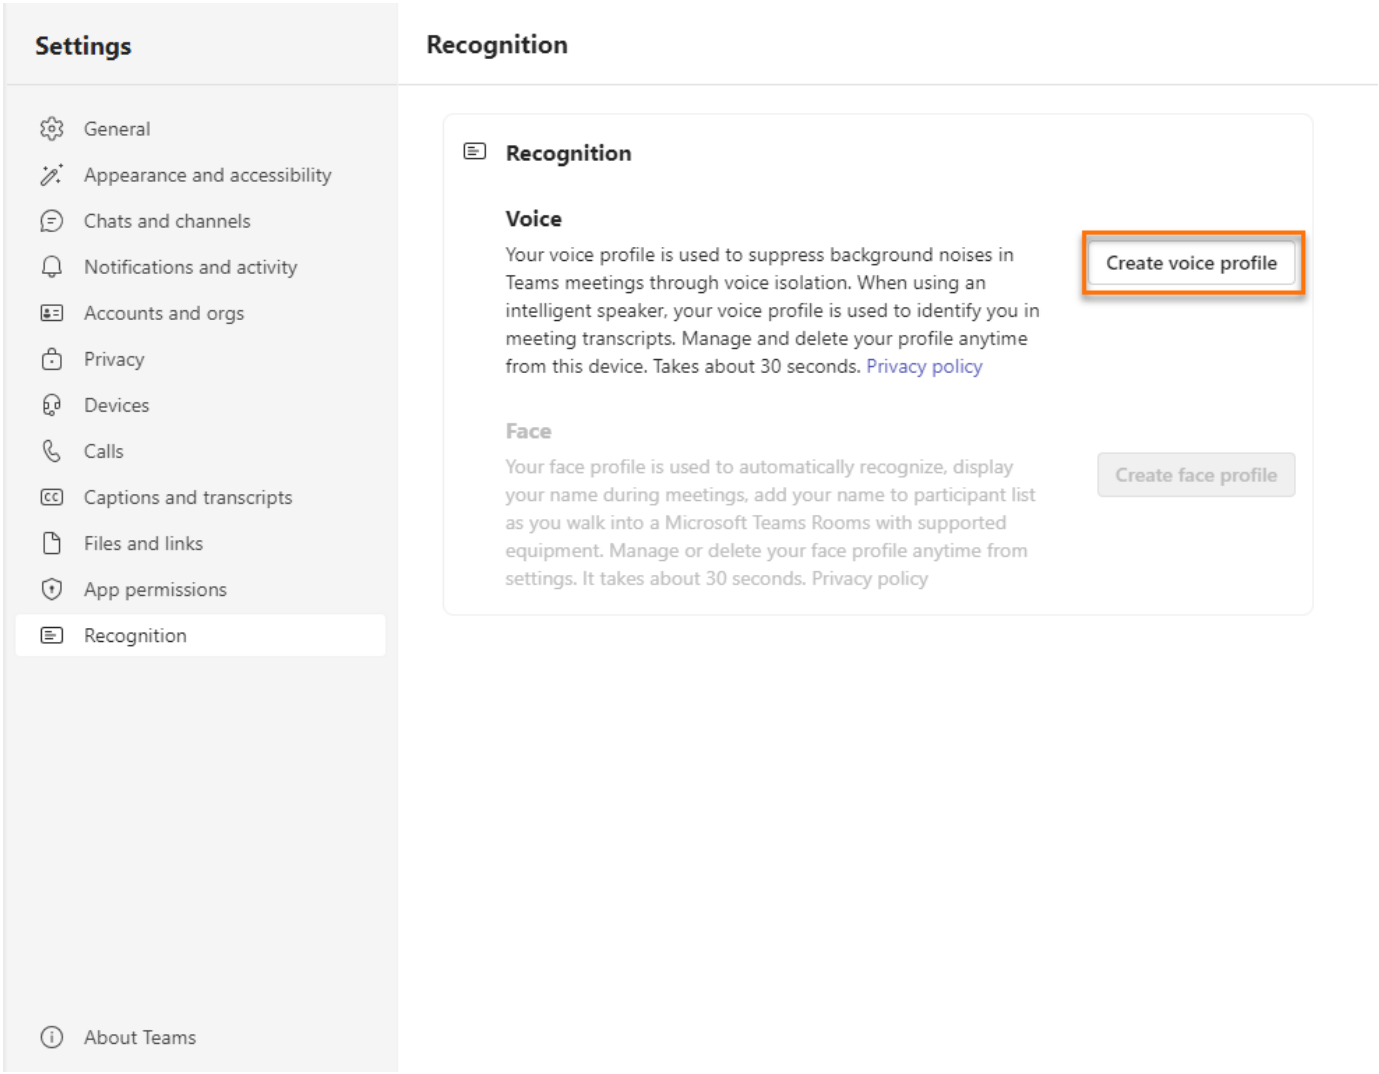
1. In Windows mode, open **Yealink RoomConnect**.
2. Select the **Yealink Intelligent Camera**.
3. Enable **Tracking Feature**.
4. From the **Tracking Mode** dropdown menu, select **IntelliFrame**.



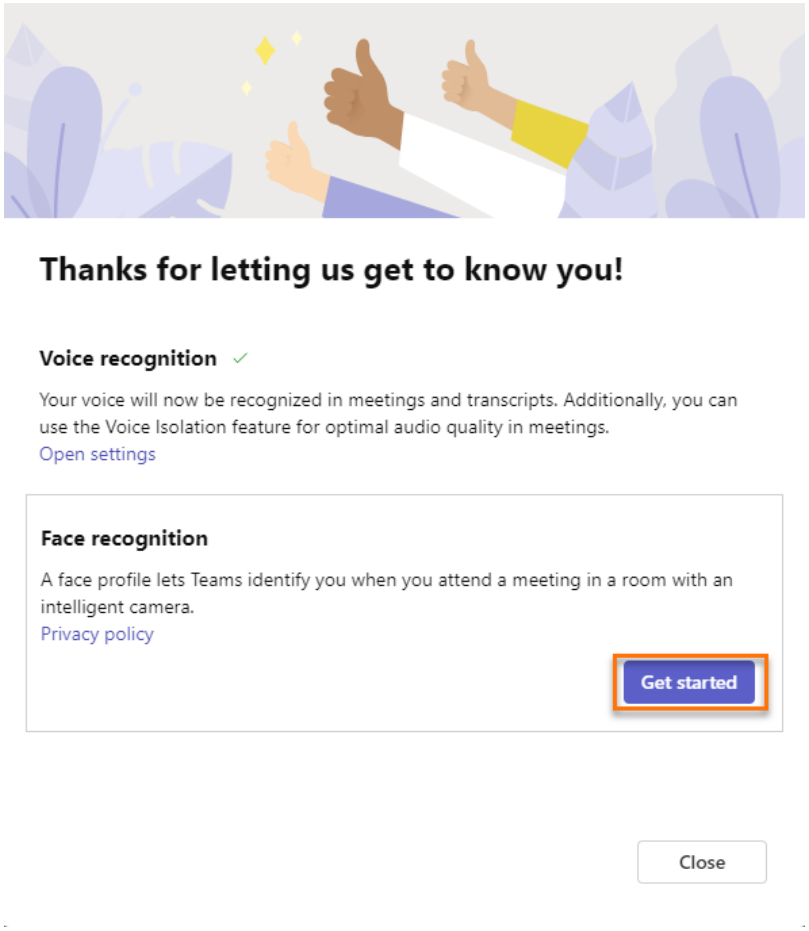
Enter Voiceprint and Portrait in the Teams Client

Create Voice Profile

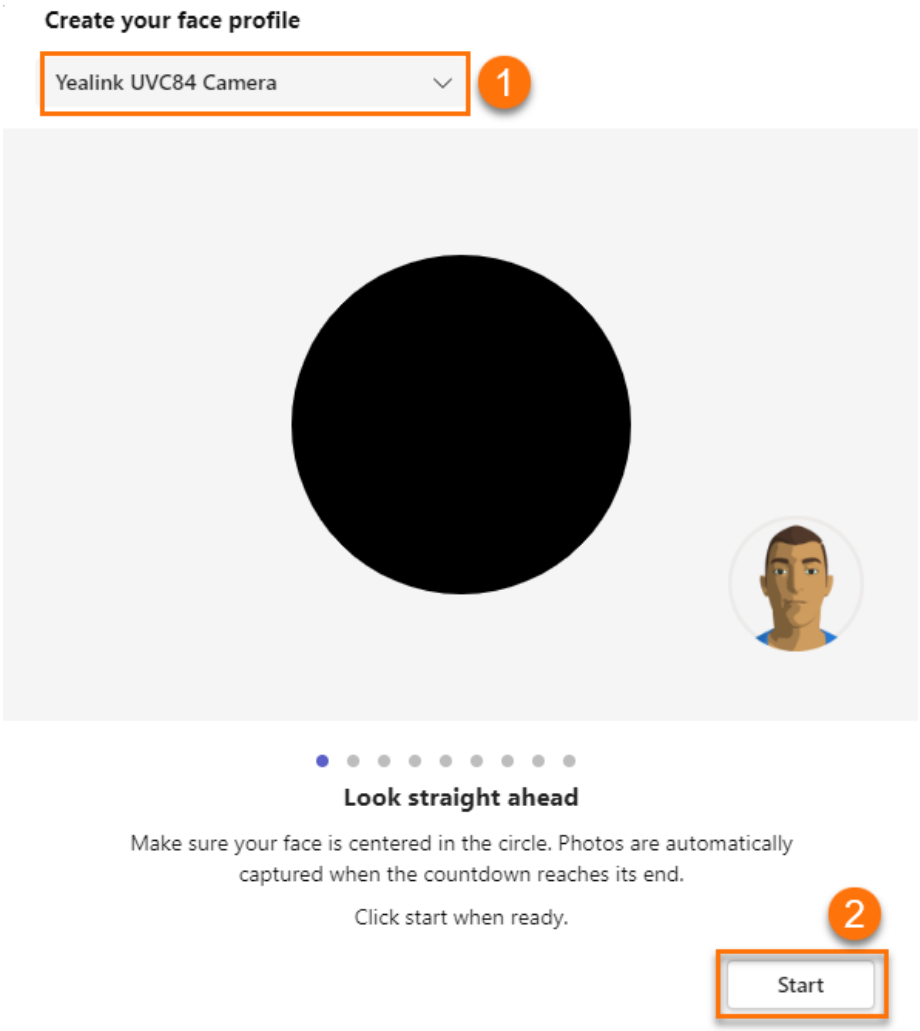
1. In the Teams client, click **Settings** > **Recognition**.
2. Click **Create voice profile**.



3. Choose the microphone, and click **Start voice capture**. Read the text in the box and click **End voice capture**.
4. In the **Face recognition** field, click **Get started**.

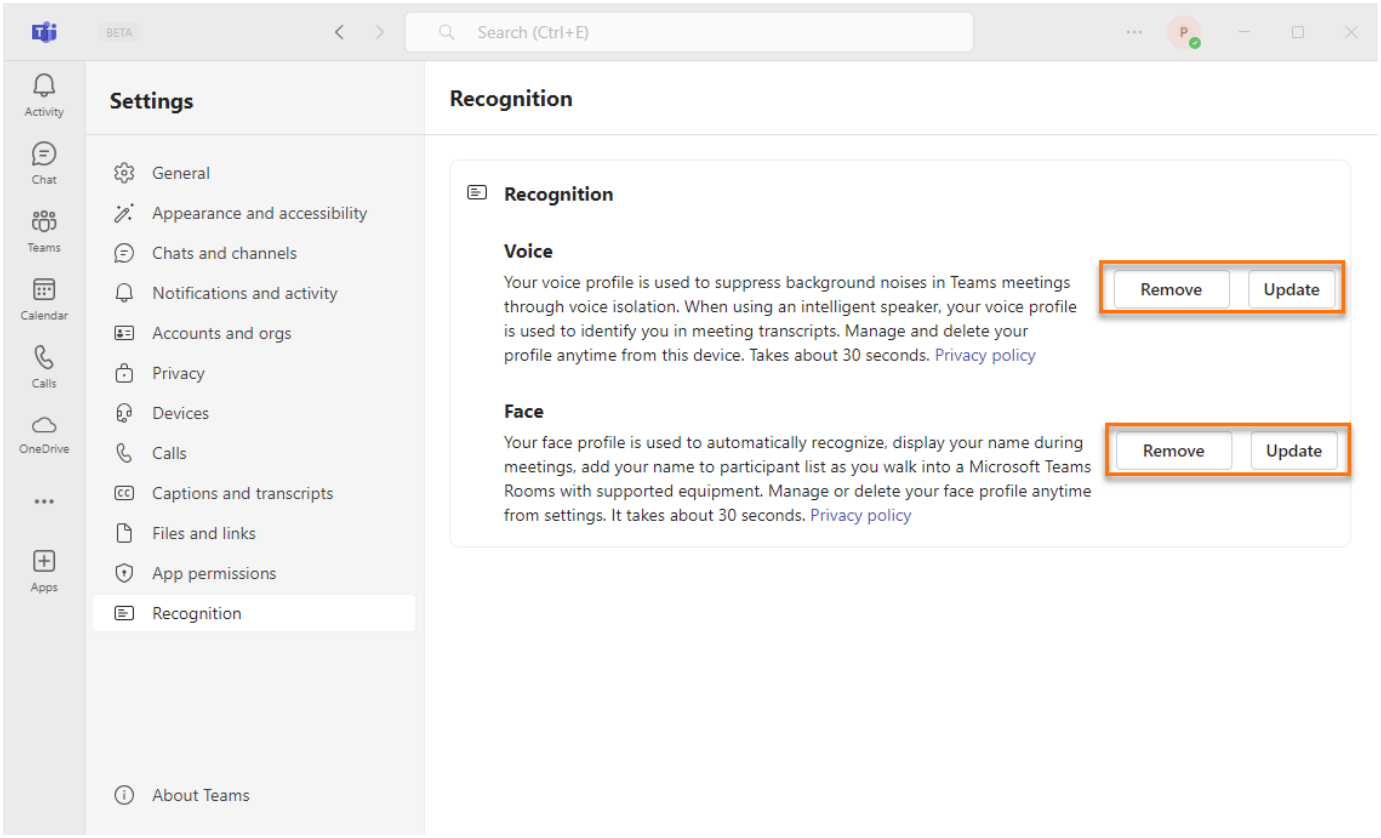


5. Choose the camera, and click **Start** to create a face profile.



Remove& Update Profile

1. In the Teams client, click **Settings** > **Recognition**.
2. To update the voice and face profile, click **Update**
3. To remove the voice and face profile, click **Remove**. Deleting a voice profile will also delete the face profile.



Teams Software Deployment

1. In the Teams client, book a new meeting.
2. Add all participants in this meeting for the IntelliFrame and People Recognition features to be enabled correctly.

> Only participants entering the meeting in the local room will be shown in the IntelliFrame. Only recognizes and flags local attendees who match the voice profile and face profile created in the account. After enabling IntelliFrame in Yealink RoomConnect, camera control cannot be performed in Teams, and camera control becomes ineffective at this time.
