

# SWITCHES

Our range of Ethernet Switches features industrial-grade reliability, network redundancy, top-level security, and simple management. All of our professional switches come with multiple mounting options for fast and effortless installation.

**TSW100**  
5 x Gigabit Ethernet  
PoE+ 802.3 af/at  
DIN rail compatible

**TSW110**  
5 x Gigabit Ethernet  
-40 °C to 75 °C  
DIN rail compatible

**TSW200**  
8 x Gigabit Ethernet  
PoE+ 802.3 af/at  
2 x SFP ports

**TSW210**  
8 x Gigabit Ethernet  
2 x SFP ports  
Din rail compatible

**TSW304**  
Integrated Din rail mounting  
4 x Ethernet  
Compact in size

**COMING SOON**  
**TSW101**  
For automotive industry  
5 x Gigabit Ethernet (4 PoE+)  
Rugged and reliable

# ROUTERS

Our routers are equipped with wireless and wired connectivity options. Diverse advanced technologies make them an essential tool to connect people, machines, and infrastructure across most market sectors. They are engineered to be easily deployed, even in challenging industrial scenarios. Meanwhile, the Linux OpenWRT-based RutOS software inside them is one of the most functional operating systems in the market.

# REMOTE MANAGEMENT SYSTEM (RMS)

Our Remote Management System allows controlling your whole solution from anywhere in the world. RMS offers remote access to Teltonika Networks products and devices connected to them from a single user-friendly platform.

**NO PUBLIC IP**

Access your devices anywhere, without public IP.

**SECURE**

Protect your data with encrypted communication.

**CUSTOMIZABLE**

Adapt the interface and functionality to your needs.

**EFFICIENT**

Optimize time and resources.
